

## HIGHLIGHTS

- > All-in-one alarm centre solution
- > Site-map based
- > Matrix features for camera management
- > Full remote control
- > Support of display on hardware monitors
- > Automated guard tours
- > Comprehensive data bases and alarm stacks
- > Sophisticated playback features
- > Multicasting
- > Available with preconfigured hardware
- > Extendible with VIDEOS-NVR

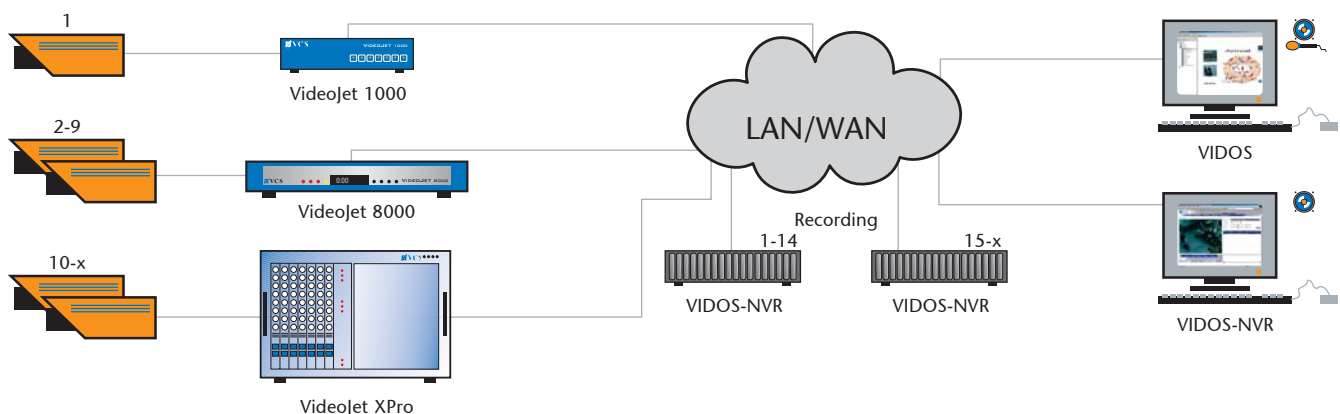

VIDOS is a unique and powerful video surveillance and alarm management product that enables companies to operate professional security and surveillance tasks with the ease of a mouse click. Based on the intuitive concept of site-maps VIDEOS makes the user feel in control and on top of all issues.

VIDOS is fully customizable and allows you to run your security system exactly the way you want to. It adapts to your working habits, unlike other systems on the market that require you to learn new principles.

VIDOS integrates with all existing peripheral equipment like dome cameras and analogue monitors. With its sophisticated touring and patrolling functions, automatic recording tasks and comprehensive archive features VIDEOS is offering functionality and performance unprecedented in CCTV applications.

VIDOS is available as software only, supporting 16, 32, 64 or an unlimited number of cameras and monitors, optionally you can choose from two pre-configured hardware solutions for easiest integration.

### EXAMPLE

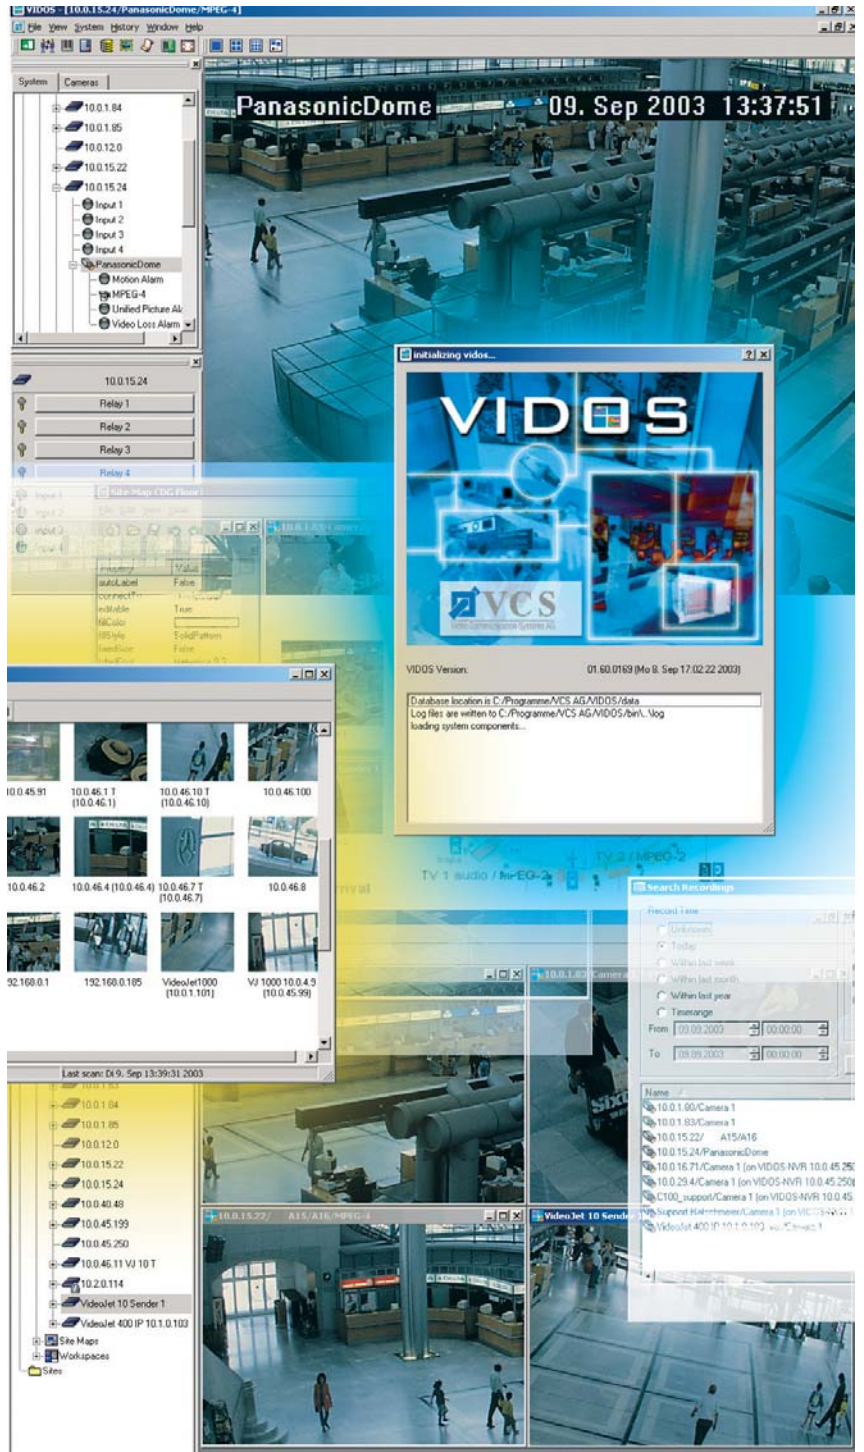

## TECHNICAL DATA

### SYSTEM REQUIREMENTS

<b>Hardware</b>	Personal Computer
<b>CPU</b>	Pentium IV, 1.8 GHz or better
<b>Hard Disk Interface</b>	IDE or better
<b>RAM</b>	256 MByte
<b>OS</b>	Windows XP Home/XP Professional
<b>Graphic Card</b>	NVIDIA GeForce FX 5700 Ultra, FX 5900 Ultra or FX 5950 Ultra, Matrox Parhelia, ATI RADEON 8500, 9500, 9800 or similar
<b>Ethernet Card</b>	100 MBit
<b>Sound Card</b>	Recommended
<b>Software</b>	DirectX 8.1
<b>Free Memory (Inst.)</b>	50 MByte

### SOFTWARE FEATURES

<b>Tree View</b>	User configurable, Explorer style resource tree
<b>Display</b>	Connection control by drag&drop User definable video windows Built-in electronic zoom function (MPEG-4) Simultaneous viewing of several video streams Full screen mode viewing On-screen or in picture p/t camera control dialog Multiple, user definable workspaces Window snap function Addition of multiple external monitors JPEG snapshot overview of all connected devices
<b>Scan Network</b>	Autoscan function over the complete network JPEG snapshot overview of all devices Remote upload of devices via LAN/WAN Scan result copy to a clipboard by mouse click
<b>Site Map</b>	Built-in site map editor Definition of background graphics (bitmaps) User definable symbols with programmable functions, e.g. Hyperlinks Placing of fully scalable software monitors Support of external hardware monitors Automatic camera activation on alarm
<b>Configuration</b>	Definition of user groups and user rights Setting of device properties Setting of device COMs for remote camera control Programming of preset camera sequences (Salvos)
<b>Trigger and Alarm</b>	Creation of logical triggers Scheduler with definable time spans Alarm stack log saving Programming of different alarm triggered jobs Integrated alarm testing button Action plans for alarm handling integrable
<b>Recording</b>	JPEG snapshot recording Recording to on-site storage media (e.g. VideoJet 1000): Simultaneous recording of video, audio and transparent data Scheduled and alarm recording Ring recording function per camera Synchronous playback of multiple cameras
<b>NVR (option)</b>	Full Network Video Recording functionality and advanced recording features by implementation of VIDOS-NVR modules (see resp. data sheet)

## ORDERING INFORMATION

ARTICLE-CODE	DESCRIPTION
<b>3504/16</b>	VIDOS Video Management System – License for one PC to manage up to 16 Cameras and Monitors
<b>3504/32</b>	VIDOS Video Management System – License for one PC to manage up to 32 Cameras and Monitors
<b>3504/64</b>	VIDOS Video Management System – License for one PC to manage up to 64 Cameras and Monitors
<b>3504</b>	VIDOS Video Management System – License for one PC to manage unlimited Number of Cameras and Monitors
<b>3505*</b>	VIDOS Station 1 – Preconfigured Desktop PC (17" TFT Monitor, 64 MB Graphics, MS Windows XP Professional)
<b>3506*</b>	VIDOS Station 2 – Preconfigured Workstation (128 MB Graphics, MS Windows XP Professional)

\*Available with British or German system language

### CONTENT OF DELIVERY

VIDOS Software on CD-ROM (and installed on the device if hardware is ordered)  
Brief description "First Steps" (german, english)  
On-line manual on CD-ROM (german, english)
